Dear Colleagues,

The posting of faculty and student research accomplishments (e.g., newly published papers, grant awards and outstanding scientific images) on the hall monitors has been well received. We encourage you to continue to share your accomplishments. Please send this information to Dr. Trusk (truskt@musc.edu) and we will not only post it on the hall monitors, but also email it to departmental faculty and staff via a regular email update.

Sincerely,

W. Scott Argraves, Ph.D., Professor
Associate Chair of Research

NEW GRANTS AWARDED TO MEMBERS OF OUR DEPARTMENT:

• AHA Grant-in-Aid to Dr. Yukiko Sugi, The Role of BMP in Regulating Valvulogenesis (1/1/2011-12/31/2012)
• AHA Scientist Development Grant to Dr. Chip Norris, Pathogenetic Mechanisms of Myxomatous Mitral Valve Dystrophy (1/1/2011-12/31/2014)

RECENT PUBLICATIONS OF MEMBERS OF OUR DEPARTMENT:

Image of the Month - January 2011
Marion Cooley / Bobby Thompson
Confocal section of cardiac outlets (ED 14.5 mouse embryo.) Wholemount immunostaining:
GREEN - PECAM marks capillaries and endocardium
RED - activated caspase-3 marks apoptotic cells
BLUE - Fibulin-1 immunoreactivity
